

Problem Set 1 - General

Question A

I came to baby-bites a lot later in the course, as I initially thought I would be able to get special considerations or a waive on problem set 1, only to get rejected by Raveen ;-).

But because of this, it made the whole problem set quite a bit easier. Although, I think baby-bites would have been easy regardless of when I did it... Baby bites was great, just keep track of what number the baby should be up to at a certain point, if the number spoken does not match, then say something is wrong. Mumbles are skips.

Done dealio.
